

It's on Steroids! TYM launches new compact tractor.

TYM's new compact T265 is a tractor on steroids as it pushes, lifts and pulls more than its rivals! This Korean-made tractor has sleek styling and is packed with features, including a level-lift quick-hitch loader and 4-in-1 bucket.

Distributed Australia-wide by Inlon, TYM tractors are renowned for high quality, well-designed products, backed by heavy research and development investment.

Gary Surman, Inlon's Sales & Marketing Manager, talks about the new TYM T265 tractor. "You always get a lot of tractor for your dollars with TYM, but you certainly won't get a lot of noise with the T265! Its Tier 4 naturally aspirated 3 cylinder water-cooled diesel 1,175cc engine is extremely quiet. The sleek bonnet gives excellent visibility of the front loader bucket, while the new lighting and instrumentation panel add modern style touches.

"The TYM T265 tractor is like a compact on steroids because it has a strong 865kg dry weight and will push, lift and pull more than sub compact tractors. In fact, the powerful 3 point linkage will lift 700kg, which ensures compatibility with most farm implements.

"Two separate hydraulic systems give plenty of flow for implements and attachments. Independent rear and mid

PTO allow operation of rotary hoes, slashers and mid mount mowers. Both PTO and cruise control are easy to operate via push buttons on the dash panel.

"The hydrostatic transmission has two ranges with two independent side-by-side HST pedals for forward and reverse, giving advanced ergonomic operation. With the brake pedals located on the opposite side of the HST pedals, you can use your brakes for 'brake assist turning' when required for extra tight manoeuvring. Wide industrial tyres deliver extra stability and traction for slopes and front end loader work.

"The operator has a semi-flat unobstructed platform with excellent entry clearance from either side. A foldable two-post ROPS frame offers both safety and versatility. Oil immersed disc braking will ensure safe and long life operation, and there is a 3 year warranty plan for peace of mind."
