

Compromise is not an option

DESPITE a reported decline in sales for the under 60hp market, in line with the broader tractor market, South Korean tractor manufacturer TYM is putting significant effort into their machines in this class.

Small acreage and lifestyle farmers in this significant market sector often feel forgotten when it comes to tractor innovation.

It seems that so many manufacturers put their R&D dollars into higher priced tractors.

That's where TYM is different. South Korean manufacturing is becoming renowned for quality and innovation, thanks to the world's highest capital investment in R&D as a percentage of GDP.

The launch of TYM's T413 utility tractor shows just how much innovation can be packed into a 38.4 hp tractor.

Available in cabin and ROPS, its latest generation Yanmar diesel engine sets a new benchmark for low noise, vibration and harshness (NVH).

"Whether you are using a tractor every day, or a few times a month, farmers

INNOVATIVE: TYM's T413 utility tractor packs a lot into a 38.4 hp tractor.

should not have to compromise on their safety and comfort," Inlon's sales and marketing manager, Gary Surman said.

"TYM uses world-recognised engines to reduce NVH, and the tractors are packed with features.

"The spacious flat operator's platform is over one metre wide, while the adjustable steering column adds further ergonomic comfort.

"The new auto throttle feature links the HST pedals to the engine throttle to synchronise the tractor's speed

and engine RPM.

"This simplifies operation, helps increase productivity and reduces fuel consumption."

TYM's T413 weighs 1,390 kg (tractor-only) with most weight coming from the cast iron components rather than

die-cast aluminium.

This delivers weight to the transmission, driveline and axles where it's needed most.

Of course, a utility farm tractor comes into its own with all the potential time and back-saving attachments.

The three-point linkage carries 1,200 kg lifting capacity and gives great versatility.

"We believe that the small farm and lifestyle sector will increasingly demand better comfort and ergonomics," Mr Surman said.
