

Quiet launch for new TYM T613 tractor

IMPRESSIVELY low noise, vibration and harshness (NVH) is a key feature of the new TYM T613, 60 horsepower, tractor that quietly replaces the previously successful - and oldest - TYM tractor in the range, the T603.

Inlon Pty Ltd is the exclusive distributor of TYM tractors and its sales and marketing manager, Gary Surman, said the launch of the new model was quiet in every sense of the word.

"Our COVID-19-safe policy meant we couldn't do a big release event," he said.

"And the Korean made TYM T613 tractor delivers a quiet driving experience.

"It has updated styling, improved ergonomics and a new smooth, quiet TYM four-cylinder diesel engine."

This versatile utility tractor, with a roll over protection

frame, has a synchromesh, 12-speed transmission.

Its Synchro Shuttle lever is under the steering wheel - ideal for loader work.

The tractor weight of 1960 kilograms is a reflection of the heavy-duty transmission, driveline and axles.

"The tractor weight is, in part, a result of the heavy front axle," Mr Surman said.

"This is important for a tractor fitted with a front end loader - as substantial forces are applied during loader operations.

"An impressive 52-degree turning circle gives plenty of manoeuvrability in small spaces."

The TYM T613 has two-speed independent PTO as standard, with 540 and 540E saving fuel on the less demanding PTO work - such as raking hay.

Its high capacity hydraulic pump - operating at 42 litres per minute - provides fast loader operation.

The two double acting remotes will suit a wider range of tractor attachments.

The tractor's steering has a separate 19 litre per minute pump.

"Ergonomically, the TYM T613 is a pleasure," Mr Surman said.

He said Inlon's TYM T613 tractor package included a self-levelling loader with four-in-one bucket, joystick control and a Euro hitch to easily use and change a wide range of attachments.

Through the Federal Government's current stimulus package, the TYM T613 tractor is one of the eligible products for an instant asset write off.

IDEAL MID-RANGER: The new TYM T613 is a heavy-weight, medium size utility tractor that can be fitted with a front end loader.
