

Compact Tractor with Big Tractor Features

The sleek and modern TYM T273 compact 4WD tractor has been re-launched with new pricing in time for Christmas. With Santa saving you nearly \$4,000, the T273 fitted with its Japanese Mitsubishi 1,318cc diesel engine, will deliver 27 hp of unbeatable performance. The large, wide wheels give extra stability and traction, whilst the level-lift quick-hitch loader and 4-in-1 bucket are standard inclusions in the \$21,990 (incl GST) package.

Gary Surman, Inlon's Sales & Marketing Manager, talks about this South Korean-made masterpiece. 'TYM's T273 tractor is often described as the compact on steroids because it has a strong 865kg dry weight and will push, lift and pull more than sub compact tractors. In fact, the powerful 3-point linkage will lift 700kg, which ensures compatibility with most farm implements.

'Two separate hydraulic systems—one for the auxiliary hydraulic remote outlets, supplied as standard equipment, and the other for the power steering—give plenty of flow for implements and attachments. Independent rear and mid PTO allow operation of rotary hoes, slashers and mid mount mowers. The PTO is easy to operate via the push button on the dash panel.

'The operator's station is a semi-flat unobstructed platform with excellent entry clearance from either side and is protected by a foldable two-post ROPS safety frame. TYM T273 has electric push button cruise control and the hydrostatic transmission has two ranges with two independent side-by-side HST pedals for forward and reverse, giving advanced ergonomic operation. With the brake pedals located on the opposite side of the HST pedals, you can use your brakes for "brake assist turning" when required for extra tight manoeuvring. Oil immersed disc braking will ensure safe and long-life operation.'

TYM T273 includes, as standard, a flip up seat for complete access to the hydraulic system, and a one touch, one-piece pop-up bonnet for easy maintenance.

Surman explains why the TYM T273 tractor has returned with new pricing. 'The T273 compact tractor was the best-selling TYM tractor in Australia ever, but it was recently overtaken by the T313 model because of the extra horsepower and features on the T313. However, the T273 has returned with a great new price point for a strictly limited stock promotion to show up its big brother and take back the mantle! The T273 and T313 tractors are the strongest compact tractors on the market and represent fantastic value with all the extra features you get for your dollars.'

Surman reminds us why the TYM T273 is not a 'sub-compact tractor' but rather a heavy-duty compact tractor. 'South Korean manufacturing is renowned for high quality, well-designed products, backed by heavy research and development investment. This means you get so much more for your dollars. The T273 will make a great Christmas present, and the icing on the Christmas cake is the 3-year factory backed warranty plan for peace of mind.'
